

We just killed the login screen.

Getting into RASID is now completely frictionless.

Log in, your way.

Google One Tap

Zero clicks. Instant access right from the page.

Google OAuth

The trusted standard. No new passwords.

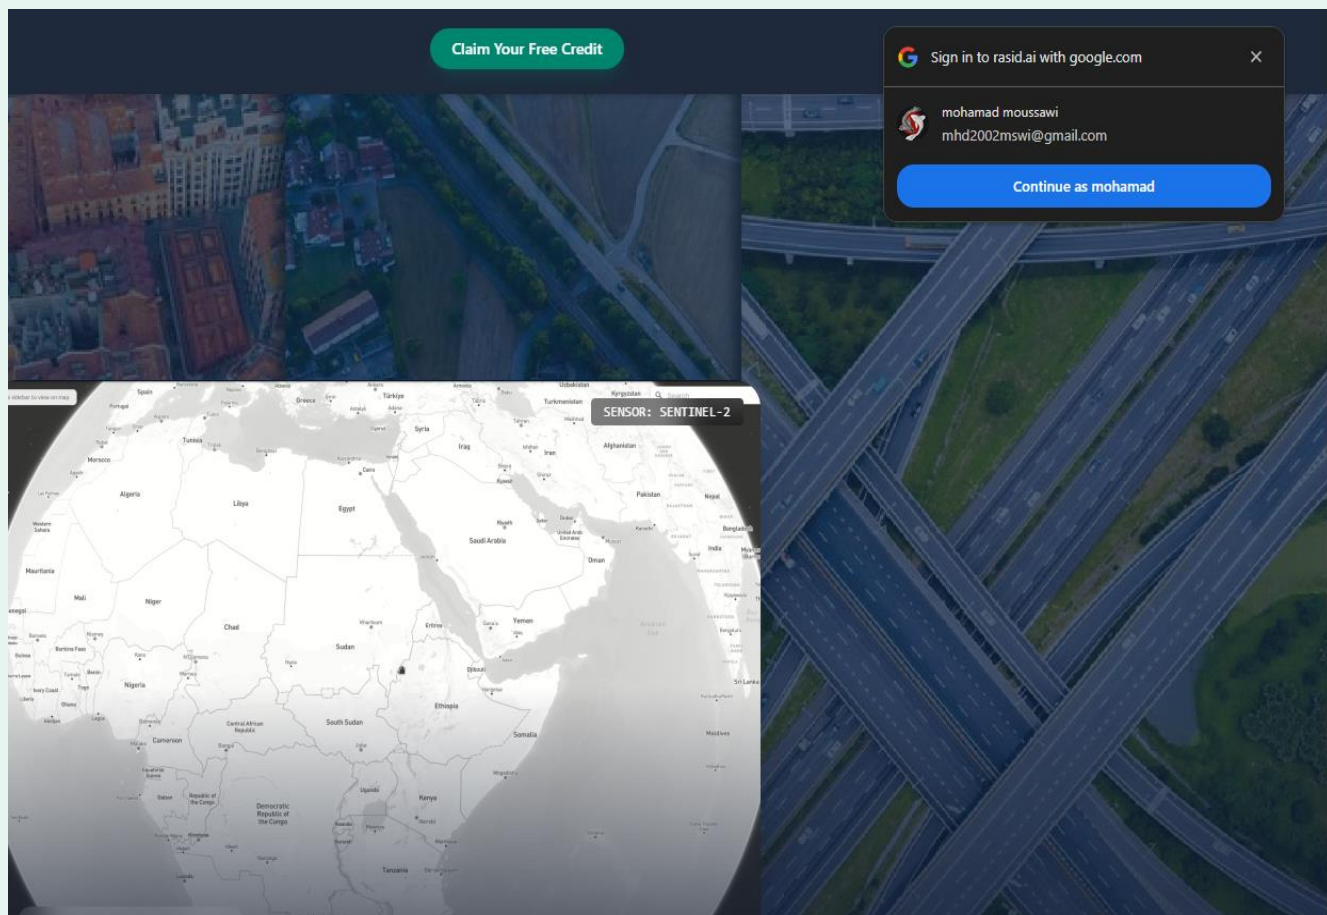

Email & Password

A clean, familiar flow for traditionalists.

The magic of One Tap.

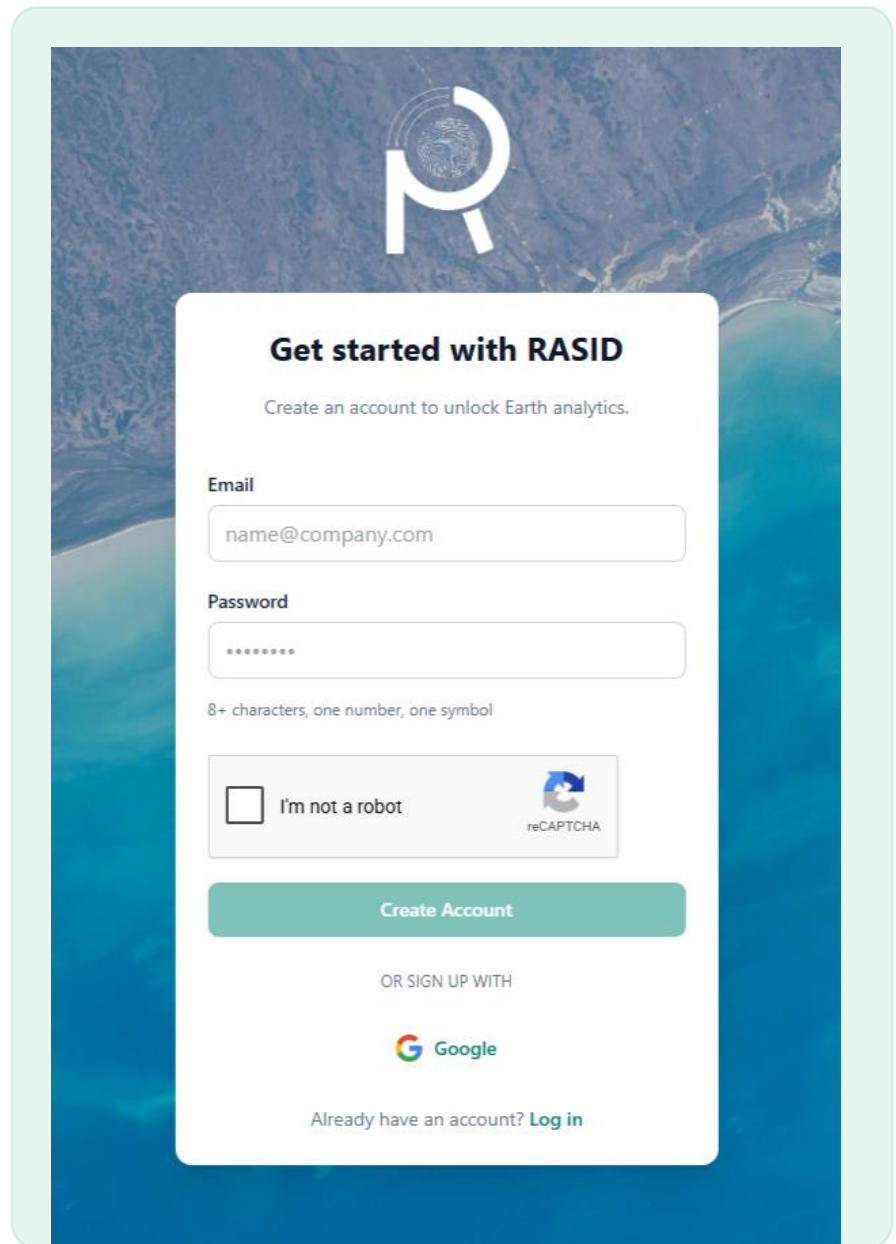

Skip the forms. If you're signed into Google, confirm the prompt and you're in. No redirects, no new tabs, no friction.

The trusted standard.

For those who prefer a deliberate click, standard Google OAuth removes password fatigue while keeping your account secure and it works for sign-up too.

We've made joining RASID just as fast as logging in. Convert from visitor to active user in seconds, without filling out endless form fields.

A screenshot of a web browser showing the RASID sign-up page. The background is a satellite image of a coastline. At the top center is the RASID logo, which consists of a stylized 'R' with a globe inside the loop. Below the logo is a white rectangular form with rounded corners. The form has a title 'Get started with RASID' in bold, followed by a subtitle 'Create an account to unlock Earth analytics.' Below this are two input fields: 'Email' with the placeholder 'name@company.com' and 'Password' with a masked password '*****'. Below the password field is a small text requirement: '8+ characters, one number, one symbol'. Below these fields is a reCAPTCHA section with a checkbox labeled 'I'm not a robot' and the reCAPTCHA logo. At the bottom of the form is a green button labeled 'Create Account'. Below the button is the text 'OR SIGN UP WITH' followed by the Google logo. At the very bottom of the form is a link: 'Already have an account? Log in'.

Try it
yourself.
